

ACE MENTOR PROGRAM
ARCHITECTURE • CONSTRUCTION • ENGINEERING
HAWAII CHAPTER

Sponsorship Opportunities

High school students in Hawaii can now benefit from a nationwide program designed to introduce them to the wide range of career opportunities open to young people in architecture, construction, engineering, and related areas of the building design and construction industry. ACE also provides opportunities for students to participate in the Construction Industry Round Table design competition and summer camp programs at the national level.

Student teams work directly with professionals from leading area firms, who volunteer their time to mentor the teams as they design hypothetical projects, tour local construction sites, and visit architectural, engineering and construction offices.

For students, it's a unique chance to discover and develop new skills, solidify future goals and get on track to exciting, rewarding careers. In addition, many students form positive relationships with industry professionals who can provide important references for obtaining college admissions, scholarships, internships and full-time employment.

The support of firms like yours will make this program a success. Funds are used to award scholarships to help attending students defray some of the costs of attending college or an apprenticeship program, mentor orientation sessions, mailings, and program materials. Please review the levels and benefits of sponsorship.

Honolulu, Hawaii 96813

Interested in becoming a mentor?

The ACE program goes far beyond technical capabilities, it requires individuals who can help the students develop leadership, organization and people skills, while also showing them a "real day in the life of" through just being yourself. Mentoring also gives the mentor an amazing networking group of others in their profession. Contact us for more information on volunteering as a mentor.
