About the ACE Mentor Program

The ACE Mentor Program was founded by the principals of leading design and construction firms, to introduce high school students to career opportunities in the industry. The mission of the organization is twofold: to enlighten and motivate students toward architecture, construction, engineering, and related careers; and to provide mentoring opportunities for future designers and constructors. ACE makes a special attempt to reach students that otherwise may not become aware of the challenges and rewards of a career in the design and construction industry.
