About the ACE Mentor Program – DC/MD/VA

ACE is an acronym for architecture, construction, and engineering. It is a unique partnership among industry professionals, college and university representatives and professional organizations throughout the Greater Washington Metropolitan Area. The ACE Mentor Program is a nonprofit organization whose mission is to enlighten and increase the awareness of high school students to career opportunities in architecture, construction and engineering – as well as other related areas of the design and construction industry – through mentoring and scholarship awards. The program makes a special attempt to reach students of all demographics; and those currently underrepresented in the industry.
