

The New Haven Chapter of ACE has three teams that meet in the late afternoon on a Tuesday, Wednesday or Thursday. Meetings are held within professional offices in downtown New Haven and on an every other week basis for approximately ninety minutes. The season begins in mid-October and ends in mid-May with a team project presentation night at the University of New Haven. Project presentation night is when each of the three teams presents their work to one another, their families, mentors, industry professionals, and educators from the student's schools.

Throughout the season students will have an opportunity to visit professional engineering and architectural firms and visit construction job sites and take a tour of a building under construction. Students will have the opportunity to work with professional architects, landscape architects, interior designers, structural engineers, mechanical engineers, electrical engineers, civil engineers, and bridge and roadway engineers, and construction managers; all the required disciplines for a successful building or transportation project.

For more information about the New Haven Chapter of ACE please contact Shawna Bartkus by email at [sbartkus@comcast.net](mailto:sbartkus@comcast.net) or telephone at 203.640.3260.
