Year 12: November Newsletter

Virtual Teams

This program year has been an interesting challenge in that students are at home for all of their sessions! ACE is rooted in hands-on experience, something we are still trying our best to provide for our students. Every few weeks, several mentors are collaborating to compile and distribute packets of materials to all our participating schools. These packets include assignments, worksheets, info packets, and supplies like glue or colored pencils. Since going virtual, we've been able to reach students across Southern Maine, and we are committed to ensuring that every student has the materials they need to be successful in the program.

So far this year, I have been incredibly impressed by how excited and engaged our students are virtually. They have questions for our guest speakers and mentors, they are completing assignments at a high level, and are looking forward to each of our sessions. I am looking forward to see their continued progress as the year goes on.

- Lead Mentor Siobhan Baker

Week one architectural concept: students created collages to explore concepts for their final project.

Students created 2D or 3D collages, primarily made from pages of an architectural magazine and supplemented by whatever things students had around their house.

AmazonSmile

ACE Mentor Program of Maine would like to wish everyone a healthy and happy Thanksgiving this year. We hope that you can enjoy a small and simple holiday this year to help do our part to keep everyone in Maine a little safer while socially distancing.

Black Friday is just around the corner on November 27. You can make an impact while you shop for Black Friday deals. Simply shop and AmazonSmile will donate to ACE Mentoring of Maine Inc.

Alfond Leaders

**Become an Alfond Leader,
Get \$60,000 to live and work in Maine!**

The Harold Alfond Foundation and the Finance Authority of Maine (FAME) offer student loan debt relief for Maine residents who are employed by a Maine-based business in the STEM-related fields of science, technology, engineering, and math. Applications will be accepted again in the spring.

Applicants will be recruited from across the nation, and current Maine residents are eligible and encouraged to apply.
